**Great Christmas gift idea**

You've been naughty to your teeth this year, but now you can be nice!

There's a new way to keep your teeth clean that's good for you and good for the environment. It's called the **Soladey-2 ionic toothbrush**. It's solar powered and it uses water as its active ingredient so it works with or without toothpaste. There are no batteries, no moving parts and the heads are replaceable. When it's exposed to any type of light it creates negatively charged ions that blend with saliva to neutralise and

disintegrate plaque. Read the results of the two major published trails that were done in Japan and Canada by dental universities.

*Soladey* retails at £12.49 for the toothbrush and £11.95 for a pack of 4 replacement heads, working out in the long term about the same as an ordinary toothbrush. It's really economical to run this amazing solar powered brush – it's been a hit for years in Japan and now it's taking the UK by storm.
